CONFIGURATION D: "LONG RIGHT" SET-UP

The illustration below shows Feline Step Shelves #1 & #2 location on the right side of the Feline Frame using the right (nearest) frame stud as the point of reference. If your space situation requires Feline Step Shelves #1 & #2 to be located on the left side of the Feline Frame then please see **Configuration C: "Long Left"** on Page C-1.

CONFIGURATION D: "LONG RIGHT" SET-UP

IMPORTANT:

Please refer to the "Configuration D" Diagram on Page D-1 while proceeding with the following steps.

NOTE:

Put down your hammer & drill. The following steps 1-4 only require a tape measure and a pencil.

STEP 1) Get On Up With The Lowest Step Shelf (Step Shelf #1)

Grab your tape measure and pencil and let's get to work! First, measure horizontally 56" from the approximate center of the nearest "Feline Frame Stud" (this is a stud that the Feline Frame is already connected to) and draw a short vertical line. A good height for the first Feline Step Shelf is 20 inches off the ground. So, draw a short horizontal line 20 inches from the floor at that spot. The intersection of these two lines creates a "cross mark". This will be the center location of Feline Step Shelf #1 and the center of the "Feline Step Shelf Anchor Template".

STEP 2) "Y" Math For The Highest Step Shelf? (Step Shelf #2)

Because the subject of "Geography" won't help us get these Step Shelves up. So, measure the vertical distance in inches from the floor to the carpeted surface of the Feline Frame Lower Shelf. Divide this distance by 2 and add 10". This final number (we will call it "Y") will be the vertical distance from the floor to the center of Step Shelf #2. (For example: if the vertical distance to the Feline Frame Lower Shelf is 58", then $Y = 58/2 + 10 = 39$ ".)

CONFIGURATION D: "LONG RIGHT" SET-UP

STEP 3) The Center of Attention (Step Shelf #2)

It's time to create the center location marks for the highest step shelf (Step Shelf #2). To do this, draw a short horizontal line 'Y' inches from the floor and a short vertical line 24" from the approximate center of the nearest "Feline Frame Stud" as illustrated in the 'Configuration D' Diagram. The intersection of these 2 lines (or "Cross Mark") becomes the center location of Step Shelf #2 and the center of the Feline Step Shelf

STEP 4) Well Done!
